

## Answer to iClicker Question #13A (Plants 3)

Which of the following is true?

- A. All plants disperse themselves by seeds. *False, only seed plants do this (gymnosperms and angiosperms, among others)*
- B. All plants disperse themselves by spores. *False, only “lower” plants do this (mosses, ferns, etc.)*
- C. All plants have flowers. *False, mosses, ferns, and gymnosperms don't have flowers.*

So the correct answer is (E).

## Answer to iClicker Question #13B (Plants 3)

Parts (A), (B), and (D) are all sporophyte - therefore diploid. Part (C) is male gametophyte - therefore haploid.

Therefore, the only correct answer is (C).
