

Bio 111 Pre-Lab for Lab #11: Name _____
Aipotou III. TA & Sect. _____

1) Give the amino acid sequence of the purple protein that you designed in *Aipotou II*. (2 pts)

2) Briefly describe a strategy that you would employ to produce a pure-breeding purple flower using Aipotou. This need not necessarily work and you do not need to give specific DNA changes, but it must be reasonable. (8 pts)
